

Sprint Goals

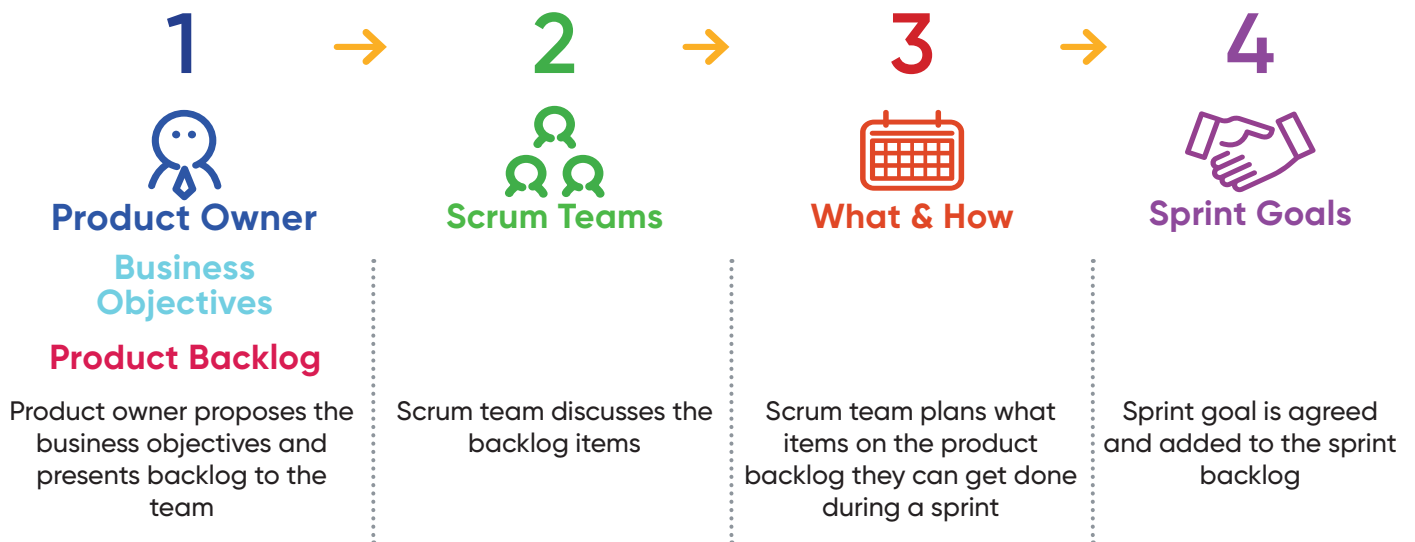

A sprint goal is a commitment in scrum. It is the objective that is set for the sprint that gives guidance to the developers on why they are building the increment.

Managing sprint goals

- Created in sprint planning and added to the sprint backlog
- Progress is inspected in the daily scrum
- The sprint goal must be achievable in a sprint
- The sprint backlog can be adapted during the sprint in order to meet the sprint goal
- Attainment is discussed in the sprint review

Why have sprint goals?

- ✓ Promotes collaboration by the whole scrum team in sprint planning
- ✓ Provides flexibility regarding functionality developed during the sprint
- ✓ Helps the team focus on one coherent concept
- ✓ Helps the developers collaborate

Anti-Patterns

- No sprint goal set during sprint planning
- The sprint goal is too vague
- Multiple sprint goals
